

# TParker

I have been writing and recording music for over 20 years. My first MIDI sequencer was Master Tracks Pro on the Commodore 64 and I used an AKAI cassette-based 4-track recorder to record my music. Since then, I've added new gear whenever I could. I have formal training on the piano, trumpet and baritone. Piano is my main axe. Click [here](#) to view my studio's hardware list. I write music because I enjoy doing it. Every now and then I come up with a pretty good tune. I've written many more songs than this, but I recorded a lot of the better ones long ago (in a galaxy far, far away...) I'd like to redo them now that I know more about recording than I knew then - and have more and cooler gear to boot. I hope I live long enough... Thanks for listening.
